

**Clipeer** is a collaborative digital asset platform designed to help students eliminate "information silos" and regain the 4.5 hours typically lost each week to file mismanagement. Our target users are students from Secondary to Tertiary Education who require a secure, logical way to share materials without the risk of accidental deletions or version confusion. For the layout since I didn't include my designs, I would however be featuring a Deep Midnight and Electric Cyan to reflect a high-tech, professional atmosphere that emphasizes "Precise Logic" while remaining easy to read during late-night study sessions. One of the two main challenges I faced was simplifying complex permission settings into a user-friendly interface that a beginner could navigate instantly and the way I have to make this unique in a way that it doesn't feel too generic. If given more time, I would make a better UI/UX and better functionalities. This project successfully bridges the gap between chaotic digital storage and a streamlined, archit
